PRA System®
Hosted revenue accounting services

PRA System

Hosted revenue accounting services

Transform your revenue accounting operation into an advanced information center

Navitaire's PRA System Hosted Passenger Revenue Accounting Services provide superior accounting controls to help increase your accuracy, timeliness and revenues, while lowering costs and improving your efficiency. The system allows you to capture, account for and report on the complete scope of passenger revenue accounting events. The comprehensive set of PRA databases track sales, interline and refunds activity, and when combined with the advanced, integrated analytics tool, helps clients transform data into information to provide powerful insights to help improve business decisions.

Benefits

Support Higher Revenues

Help maximize your revenue collection by identifying and automating complex interline billing and proration calculations, recall of commissions and unreported sales.

Gain Superior Accounting Controls

Consistent and automated accounting practices enable you to manage key revenue and liability accounts with confidence.

Increase Accuracy and Timeliness

Make well-informed decisions based on timely and accurate reporting of sales and revenue information, enabled by our automated data capture, lift processing and interline settlement functions.

Comprehensively Manage and Analyze Business Information

Precise, detailed and timely information helps transform your revenue accounting department into a reliable collection and distribution source of critical revenue information. Use this rich data, together with the advanced, integrated analytics and query tools, to drive improved business decisions.

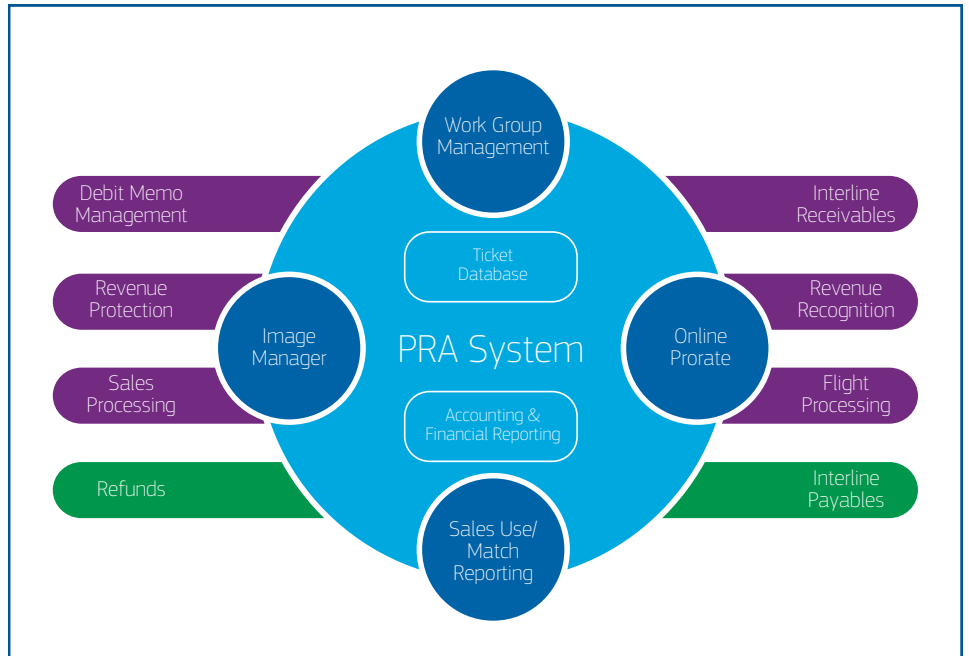

Lower Costs and Improve Efficiency

Increased automation requires fewer resources and allows management to shift its focus from monitoring clerical functions to analyzing business results.

PRA System

Hosted revenue accounting services

Powered by their centralized databases, PRA System applications perform integrated processing from sales through use, and generate detailed revenue information for advanced analytics and improved business management

Features

- Integrated analytics solution supports dashboard and ad-hoc query creation, plus scheduled reporting processing
- Sophisticated pricing and proration models support industry standard prorate, IATA weighted miles, provisos and a variety of special prorate agreement terms
- Detailed unearned revenue liability reconciliation and analysis reporting
- Centralized accounting module with flexible event and account mapping functionality and drill downs
- Compatible with industry neutral proration engines for IATA First and Final settlement processes
- Comprehensive sales, use and flown revenue information outputs
- Scalable client-server architecture grows with your business
- Supports airline IATA Simplified Interline Settlement (SIS) compliance goals via electronic settlement of sales with interline carriers
