Navitaire dotREZ Mobility
## dotREZ mobile applications for iOS and Android

Advanced market-ready mobility

Navitaire dotREZ Mobility delivers a complete mobile solution, supporting the full range of services spanning the passengers' travel life cycle.

Navitaire dotREZ Mobility is a comprehensive native mobile application*, available on both iOS and Android, which provides trip planning, reservations, booking management, check-in with mobile boarding pass functionality, and ancillary sales opportunities.

Developed to let your company give digital travelers a richly featured, omni-channel experience, dotREZ Mobility integrates with Navitaire's suite of market-leading industry solutions for reservations, retailing and travel commerce. By providing a strong mobile foundation, dotREZ Mobility empowers air and rail companies to build a closer relationship with customers using customizable, cutting-edge options to meet today's demands and fuel tomorrow's innovations.

Stay at the forefront of the mobile revolution. Tap into new technologies to create innovative mobile service offerings for your clients.

Navitaire dotREZ Mobility
dotREZ mobile applications for iOS and Android

Benefits

Establish Comprehensive, Convenient Self-Service 24/7/365
- Creates new opportunities for customers to plan, purchase, and manage their travel experience…on the go, anytime, anywhere
- Extends brand identity across customer touch-points

Omni-Channel Digital Capabilities to Reach More Customers
- Delivers a complete, rich experience for passengers as they move from web to mobile interfaces, and booking to service aspects
- Enhances the customer experience while driving greater loyalty through sales of flight-related and other ancillaries all via an integrated ancillary shopping cart
- Facilitates use of shared customer profile from carrier's website, to provide fast and easy "one-click" booking using a securely stored payment card

Tight Integration Provides Speed-to-Market
- Deploys mobile apps that readily integrate with the full Navitaire product suite, including New Skies® and Navitaire Rail
- Streamlines development timelines with customizable off-the-shelf components
- Enables lower development, deployment and training costs through unparalleled integration with Navitaire's advanced dotREZ and New Skies technologies

Advanced Technology from a Trusted, Experienced Provider
- Leverages the scalable and integrated dotREZ API platform, utilizing the latest mobile-optimized API technologies such as JSON, REST, and GraphQL, which power high-growth companies and dynamic ever-evolving passenger needs
- Utilizes Navitaire's common functionality to help lower implementation and maintenance costs by sharing code and technologies across multiple channels
- Builds on the knowledge and experience of Navitaire-trusted industry leader, effectively using the latest technologies and driving ongoing innovation

Features

Connect with Digital Travelers via a Cross-Channel Mobile and Web Experience
- Supports multiple product and fare classes in availability searches
- Provides customers with full-featured app to book or change reservations, check-in, issue mobile boarding passes, select seats, pay baggage fees, buy travel insurance and get flight information
- Helps customers build their itinerary, add ancillaries, provide payment details and complete bookings using integrated shopping cart functionality
- Processes payments via Navitaire's integrated and secure SkyPay® engine

Intuitive Design Coupled with Diverse Content
- Presents graphic-rich seat map displays, with seat-specific mapping and fees as well as calendar-based, low-fare results to travel planners
- Provides localization features that include the user's language and preferences

Features

- Generates mobile boarding passes, which can be integrated with Apple Passbook or similar Android-based solutions
- Supports the collection of passenger-specific travel documents, payment types and basic profile data

Expand and Enhance Ancillary Product Sales

- Promotes revenue-generating mobile sales of SSRs (bags, sports equipment, etc.), seats (fee generation), plus supports integration with Navitaire's Travel Commerce platform, stimulating cross-platform ancillary sales
- Offers one-stop shop-buy-and-pay using an integrated shopping cart
  - Integrates with New Skies fee options, Navitaire Travel Commerce, and other provider solutions to facilitate sales of flight-related or travel-related ancillaries to boost profitability
- Flexible architecture supports integration with carrier's travel commerce insurance, hotel and car rental business partners
- Able to create tailored experience, based on each traveler's preferences

One Package: Rapid Deployment, Advanced Technology, Integrated Products

- Supports multi-language content to create customized applications to target new, diverse customer segments
- Shortens product implementation timeframe with a "shelf-ready" base. Launch with initial scope, and expand functionality later.
- Remains compatible with dotREZ platform to leverage newest capabilities
- Built using a cross-platform toolset, dotREZ Mobility is a set of native applications built using Xamarin technologies for both iOS and Android. Xamarin enables a shared code base across platforms, and user interfaces are built with high-performance native toolkits
- Delivered by the agile Navitaire NPS high-performance delivery team, using the latest tools and methodologies, in a continuous build and deployment process. NPS offers a range of app customization options, ranging from minimal configuration and reskinning, to more complex business logic and workflow modifications.

*Navitaire dotREZ Mobility deploys as a native application, utilizing integrated device features via the Apple App Store or Google Play.

Navitaire delivers industry-leading technology services that help enable growth, profitability and innovation to more than 50 airlines and rail companies worldwide, including many of the world's most successful airlines. Navitaire offers a full suite of proven solutions to help clients grow their business, reduce costs, capture new revenue sources and readily connect with digital customers and business partners.
